JFE MERANTI Myanmar Co., Ltd. All Rights Reserved.

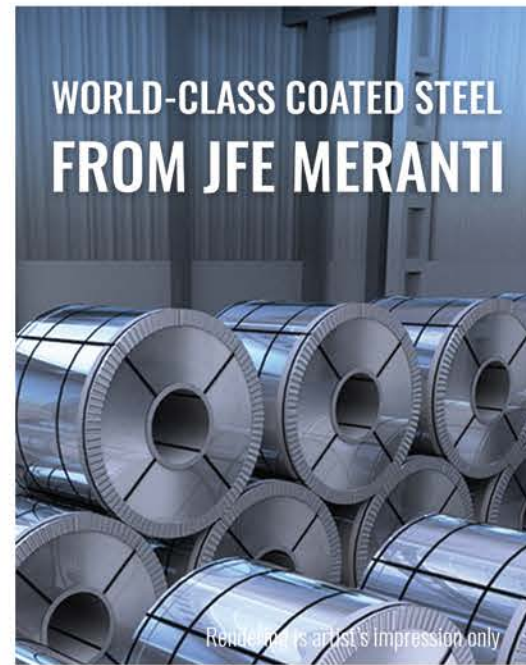

**PREMIUM 55% ALUMINIUM-ZINC
ALLOY COATED & COLOUR COATED STEEL**

JFE MERANTI® Myanmar (JMM) is a joint venture between JFE Steel, Meranti Steel, JFE Shoji, Marubeni-Itochu Steel and Hanwa. These distinguished international companies have shared resources to jointly design, construct and operate a world-class metal coating and colour coating facility located in the Thilawa SEZ, Yangon. JMM products are specially formulated for the Myanmar climate to satisfy modern construction requirements. By delivering longer lasting and consistent quality coated steel, JMM helps to increase the durability of your projects.

ALZU® is a premium 55% Aluminium-Zinc alloy coated and colour coated steel product, available with high quality AZ100 coating. ALZU® steel is designed and manufactured by JMM to be an exceptional fit for roofing, walling and accessory applications within industrial, commercial, institutional and residential projects.

Combining European technology and Japanese knowledge, our coated steel products bring superior value and a market leading offer to customers. When you choose ALZU® 10 steel, you are guaranteed the highest quality products and superior value-added services necessary to grow your business.

RELIABLE SUPPLY

CONSISTENT QUALITY

LOW MINIMUM ORDER QUANTITY

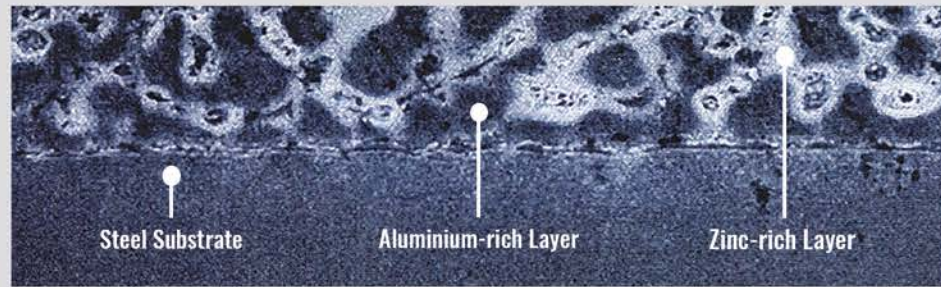

SHORT LEAD TIME

PERFORMANCE WARRANTY

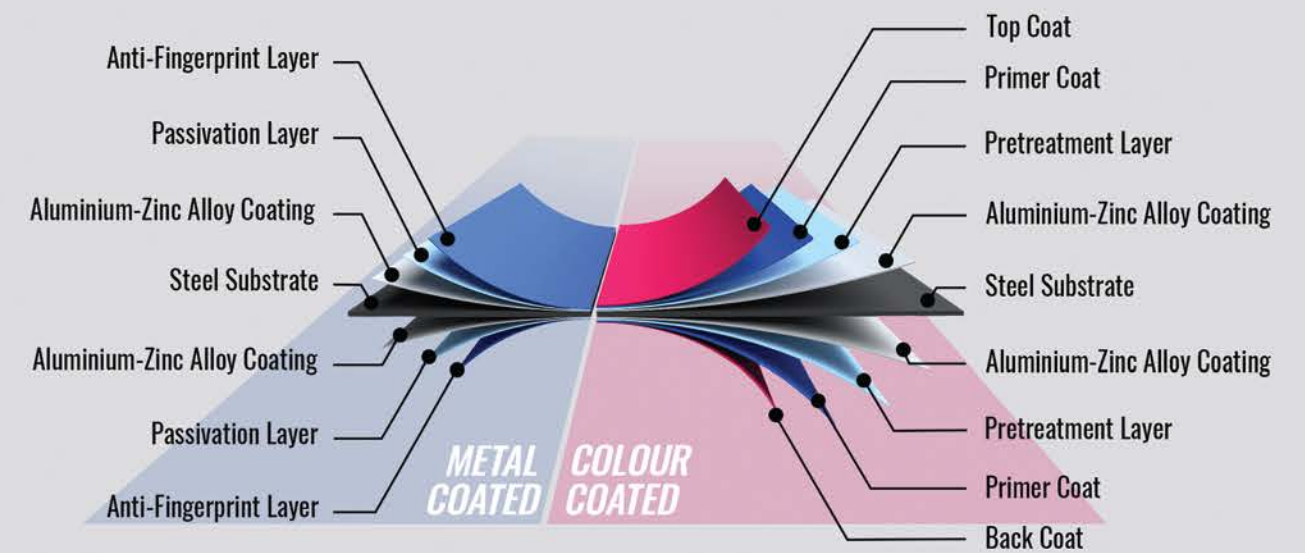

SUPERIOR TECHNICAL SUPPORT

ALZU® steel uses its alloy coating of Aluminium and Zinc to achieve excellent corrosion resistance performance and surface appearance. The ALZU® steel coating forms an interlaced mesh structure of Aluminium and Zinc. The Zinc-rich areas are the first line of defence in protecting the steel substrate, while the Aluminium-rich layer provides the second line of defence. These two layers work together to provide superior corrosion resistance performance for roofing and walling products.

PRODUCT RANGE	ALZU® 10
Coating Mass	AZ100
Minimum Yield Strength (Mpa)	550
Base Metal Thickness (mm BMT)	0.30
Width (mm)	914
Top Coat / Top Primer Back Primer / Back Coat Coating Thickness (µm nominal)	15 / 5 5 / 5
